Hard tissue and
soft tissue

Multimodality

Diagnostic and
Intraoperative

Smart technology

Easy to move

Multimodality

High Definition Volumetric Imaging (HDVI)
Computed Tomography and Fluoroscopy
in one device.

Diagnostic and intraoperative use

Diagnostics, preoperative, intraoperative and
post-operative environments: our technology
offers full capabilities.

Easy to move

Our machines easily move around clinical rooms.

Smart technology

Our technology significantly reduces
infrastructure and maintenance costs. Key
advantages include low electrical consumption,
remote technical assistance, and compact design.

Hard tissue and soft tissue

Outstanding image quality in hard and
soft tissues.

Savana

Our High Definition Volumetric Imaging (HDVI) technology is the most advanced form of **Flat Panel CT** technology. It delivers high-quality diagnostic imaging for both **hard and soft tissues**. This technology includes specific presets and customizable accessories designed for zoo animals.
